Dear Federal Communications Commission:

As you consider the conditional approval for LightSquared, I write to ask you to preserve the integrity of the nation's GPS system.

Last year, the federal government shut down the Loran navigation system, making recreational mariners solely reliant on GPS for all electronic navigation needs. Like so many other GPS users around the country, GPS is now integrated into our daily outings, and we look to the FCC to protect the integrity of the GPS signal.

Sincerely,

Raul Esqueff

Like so many other GPS users around the country, GPS is now integrated into our daily outings, and we look to the FCC to protect the integrity of the GPS signal.

I have been boating for 50 years. While I believe in using charts for navigation, GPS has become absolutely necessary. To compromise the GPS system we now have would set us back 20 years. GPS navigation is now also a much used tool in motor vehicles and supplies much more than just navigation. Again, please preserve the integrity of our nation's GPS system. Thank you Frank Havens

Like so many other GPS users around the country, GPS is now integrated into our daily outings, and we look to the FCC to protect the integrity of the GPS signal.

Not long ago a friend went up river in the Santee-Cooper area of South Carolina to catfish. When fog settled in, visual navigation was impossible for his return due to rocks and tree limbs no longer visible. Thanks to the recorded GPS track of his trip up-river, he was able to safely return by following the track, and made it out without a scratch on his boat.

Thank you for your consideration!

Sincerely,

Walter Simonsen

Like so many other GPS users around the country, GPS is now integrated into our daily outings, and we look to the FCC to protect the integrity of the GPS signal.

As a fishing charter captain, GPS is an integral part of the successful operation of my business. It assists me on every trip with locating fishing spots and with navigating to and from remote areas. The removal of GPS integrity will impact not only my ability to find remote fishing spots in open water, but could impact the safety of my clients and myself. It will have a direct negative impact on my business and the security of my passengers.

Please consider the impact to the boating, fishing, and general outdoor oriented citizenry who use and rely on GPS. Please preserve the integrity of the signal for citizens, and not for business.

Thank you for your consideration.

Sincerely,

Capt. Andy Cappar
